

PATTERN BOOK

tree + forest

is a father-daughter design partnership, Mark and Eugenie. With our combined backgrounds encompassing art, design, architecture, personalised service and product delivery, we have collaborated to create a range of tile patterns that are individually hand-screened in our studio.

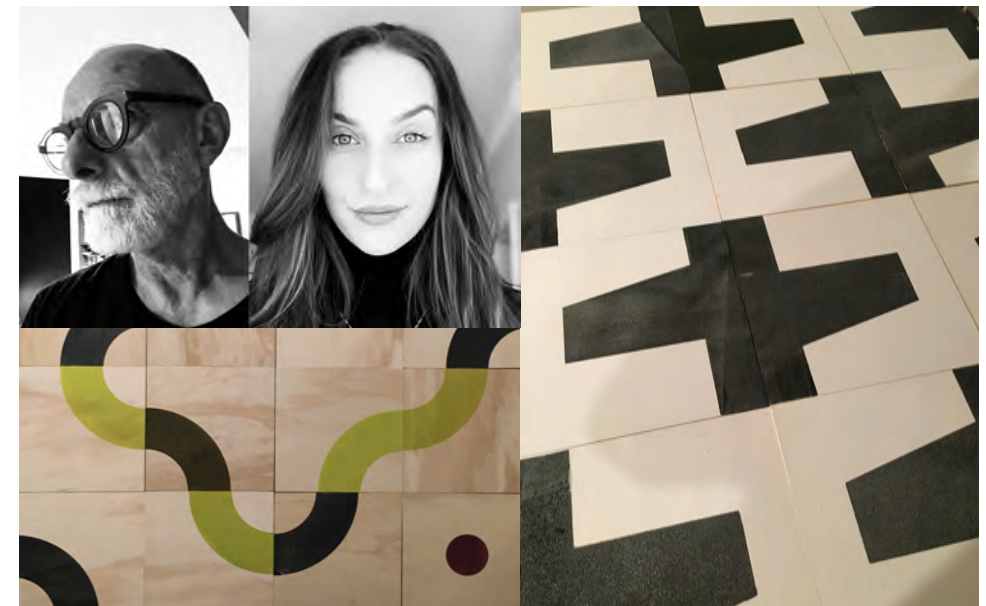

Each pattern offers an opportunity to explore a multitude of possibilities via simple repeated shapes and colours.

Within each tile is a texture and depth that separates it from any other within the pattern - delivering a natural diversity and authenticity - making each and every installation an individual experience.
